

# THE RALEIGH NEWS

VOL. XIV—NO. 54.

RALEIGH, N. C., WEDNESDAY MORNING, OCTOBER 30, 1878.

\$5.00 PER ANNUM

## A GREAT TRESTLE FALLS.

**Damage on the C. C. Railway—No Lives Lost—Repairing Damages.**

Special Telegram to the News.

HARTLEY, Oct. 29. Twenty-one spans of the high trestle, thirty to forty feet high, near the Pease River, fell to day. It was being repaired, and when the track was raised the trestle collapsed. No lives lost. A very large number of hands are at work repairing the damage, and trains will soon pass over.

## Foreign Finances.

By Cable to the News.

French capitalists took good three months bills here yesterday as low as five per cent discount. In Paris in open market the rate of discount was 2 1/2 %. The next Bank of England return is expected to show favorable changes, three hundred and fourteen thousand pounds having gone into the bank from abroad since Thursday, and a hundred thousand pounds from Scotland, and a half million pounds from the East being expected to go in to day. The further return of gold and notes from Scotland is anticipated. The Times financial article, however, is apprehensive that the money market is not safe from American and German demands for gold. The Afghan affair may require the Government to send silver to India. The Indian market for silver is now bare, and the demand there is very great. The price and so on, but the German stock, which is believed to be still large.

## Russia to be Held to Her Promises.

By Cable to the News.

LONDON, Oct. 29. A special from Vienna to the Independence, Belge, of Brussels, says England has addressed a protest to Russia against her non-execution of the treaty of Berlin, but the Times in a leading editorial article, while admitting that the time has come when some step must be taken, thinks the collective representation of the powers will be most effectual and believes France, Austria, and Germany will not hesitate to unite with England in protecting the provisions of the treaty.

## The British Lion Roars.

By Cable to the News.

LONDON, Oct. 29. The Pall Mall Gazette editorially declares that the treaty of Berlin is a failure, and it will be impossible to arrive at a peaceful solution of the lines, and that the sooner this fact is recognized the better. Peace, it says, must be commanded by commanding the power of the reckless power which has kept Europe in commotion for years past, and now threatens to break away from all law and all restraint. If this is only to be done in concert, and concert is a give and take matter, for the benefit of which all parties must pay something, it follows that we should not shrink from any price in reason.

## Rush by Depositors.

By Telegram to the News.

NEW YORK, Oct. 29. Depositors thronged about the Manhattan Savings Institution to-day and were informed their money was all right and would be paid at the end of forty days. Circulars were issued to-day setting forth the numbers and other particulars of the stolen bonds. No arrests yet made. The private owners of some of the stolen property advertise, offering rewards for their restoration.

## The Deeds of Tramps.

By Telegram to the News.

CINCINNATI, O., Oct. 29. Three tramps came to the house door of a farmer near Parkersburg, W. Va., yesterday and asked for food. The farmer's daughter opened the door but refused the request. One of the tramps stuck her a blow in the face, pushed open the door, beat the farmer's wife badly, took everything that could be used to them and escaped. They were pursued but succeeded in making their escape into Ohio.

## Unitarian Convention.

By Telegram to the News.

PHILADELPHIA, Oct. 29. The General Unitarian Convention, which assembles in Philadelphia to-day, will be presided over by Hon. Dorman B. Eaton, of New York. Rev. Henry W. Bellows, D. D., of New York, will preach the opening sermon. Leading addresses will be made by Rev. James Freeman Clark, D. D., of New York, and Rev. W. H. Furness, D. D., of Philadelphia.

## Yellow Death.

By Telegram to the News.

MEMPHIS, Oct. 29. The weather has moderated and a light rain has been falling since early morning. From six last night until noon to-day there were seven deaths. This includes the deaths both in and outside the city.

W. J. Chase, Acting Postmaster, was stricken with the fever last night.

## New Orleans, Oct. 29.

A heavy rain is falling this morning.

Fifty-two new cases and ten deaths were reported during the past twenty-four hours.

Total number of cases to date, 13,022; deaths, 3,904.

## Mexican-American Exposition Proposed.

By Telegram to the News.

CITY OF MEXICO, Oct. 29. The Minister of Public Works announces that the Government, at the suggestion of Zamacoena, is about to nominate a commission to organize a special exposition to take place at a conveniently early date, for exhibition exclusively of American and Mexican productions. The same is to be held in this city, under the direct auspices of the Government.

## Stoppage of English Factories.

By Cable to the News.

LONDON, Oct. 29. The Manchester Guardian publishes a statistical showing that about 60 per cent of the looms and spindles in the Lancashire and Cheshire cotton districts are stopped or are working on short time.

## Washington News.

By Telegram to the News.

The Commissioner of the Land Office reports that 84 millions of acres of public lands were sold during the year, and 1,000 millions of acres are yet unsurveyed. The U. S. Attorney General for Texas says the greater part of the arrests of political offenders in that State were on

## complaint of Greenbackers and not Republicans.

Affairs on the Mexican border are more pacific. There are more incursions of Indians into Mexico than raids of Mexicans into this country. The troops now act in concert.

The Treasurer of the U. S. endorses the recent opinion of the Attorney General on the subject of the taxation of National Banks. That is that henceforth the face and not market value of bonds shall be considered. No application for refunding of former payments will be entertained.

Quite an amount has been received for and sent to this yellow fever sufferers.

## Electric Flashes.

By Cable and Telegram to the News.

The Market National Bank, of New York, will reduce its capital stock from one million to a half million on the first of January.

The laborers in the English counties of Sussex and Kent are holding vast meetings to protest against reduction of wages, which will affect some 15,000 persons in those counties.

Orders have been issued for the collection of stores and transport for 20,000 men at Peshawar, India.

The Vienna Presse says England alone has demanded an explanation at St. Petersburg of the Russian movements in Roumania.

## Baconfield III.

By Telegram to the News.

NEW YORK, Oct. 29. A London special says England is much moved by the illness of Lord Baconfield. His strength, impaired by political worries, complications and contests, has been steadily failing. He has since been laid. At last accounts he is better. A special session of the cabinet was held to consider the case.

## The Fishery Question.

By Telegram to the News.

WASHINGTON, Oct. 29. The State Department publishes Secretary Evarts' letter to the English government in regard to outrages committed upon American fishermen on the Newfoundland coast. He expresses dissent at the British attitude in the case, and suggests that it is not premature to consider our course of action should England persist.

## Austrian Officers as Persian Insurgents.

By Cable to the News.

LONDON, Oct. 29. Twelve Austrian officers left Vienna yesterday for Tehran, to re-organize the Persian Army on the model of the Austrian Army.

## A National Billiard Tournament.

N. Y. Times.

A national billiard tournament is being arranged, which is intended to bring together all the leading players in the country, and will take place about the middle of December. The games will probably be played at Irving Hall. The first prize will be \$1,000 and a gold badge. A. P. Gudephoe, Joe Dion, William Sexton, George L. Stone, A. Bessinger, and Maurice Daly have entered to play, and Slooson will probably enter. Stone and Bessinger are new Western players.

## Care of the Eyes.

Alate French work, by Arthur Chevalier, on the sight says the use of the eyes should be regulated by their strength, and that they should never be overtaxed. A habit of resting them often during work is recommended. Thus in reading or writing, stop from time to time and allow the eyes to wander over surrounding objects. To persist in working after symptoms of fatigue appear is foolish. As soon as the eyes begin to ache, or grow red, or any other sign of eyestrain, work should be discontinued and cold water applied. Do not pass suddenly from darkness into light. Artificial lights are all injurious. Wash the eyes often during the day with cold water—a remedy which, although simple in itself, never fails in every case to produce good effects. Baths of tepid water are injurious to the eyes.

## Free Trade's Blessings.

Washington Post.

Free trade is John Bright's remedy for the evils brought on mankind by war. In a letter to the recent Peace Convention, the venerable Quaker Statesman urges that if tariffs were abolished, or even if they were made very moderate, the nations would trade freely with each other. Then commerce would increase enormously, and they would, bit by bit, become like one grand unity; then commercial interests would multiply on such a scale, and then mutual knowledge and intercourse would become so intimate that the ambition of monarchs and of statesmen would be impotent to drive them to war.

## Alleged Vast Military Preparations.

The London Standard publishes a sensational dispatch from Vienna to the effect that Russia's military preparations are so vast that nobody can doubt that she is bent upon further conquests. The only question appears to be whether she will wait till spring, or recommence war before that time. The excuse will probably be the outbreaks of Bulgarians, which were gotten up by Russian agents. A camp of 60,000 men is forming at Kischineff, to replace the troops who crossed the Balkan southwards.

## An Afghan Bargain.

When an Afghan is about to sell his horse he carries on the dicker with the intending purchaser by pressures of their fingers concealed by his robe, and the animal is carefully examined, of course, not a word is said. Each squeeze of the hand means a rupee. The theory is that the horse would lose flesh through sorrow if he thought his master would part with him.

## A Defender of Fraud.

Courier Journal.

Secretary Evarts succeeded in convincing the country Thursday night that the Republican idea of a republican form of government is that in which the officials must conduct affairs not in the interest of the country at large, but exclusively in the interest of the political party to which they belong. Mr. Evarts appeared as the most bitter of partisans and a jubilant defender of fraud.

## Designs for a Statue of General Lee.

Boston Herald.

There have been executed in Rome two designs of American sculptors in competition for the proposed equestrian statue of Lee, to be erected at Richmond. One of these is by Mr. M. E.

## CALDWELL COUNTY.

**Acquitted of Murder—The Narrow Gauge Railway and its Progress—Business Depression.**

Correspondence of the News.

IN THE CASE OF STATE vs. ROBINSON

In the case of State vs. Robinson Brothers, charged with the murder of Hoak, last summer, and moved from Burke to this (Caldwell) county, the jury last night returned a verdict of not guilty. The opinion prevails that the parties were guilty of a most foul murder, but the State was unable to present before the court testimony necessary to a conviction.

Judge Gudgeon sent several recruits for Capt. Fry's company employed on the Narrow Gauge Railroad here. This company is doing splendid service, and will soon have all the grading of this road in Caldwell county finished up. The citizens of Hickory have contracted to pay a certain sum for the grading of the road bed between this town and the Caldwell line; so that there will be no further delay in the completion of the entire grading of the road. The action of Hickory not only allays the fears, but gives a new impetus to the whole business of construction at this end of the line. We think now that in less than two years the cars will be running over the whole line of the railroad.

The business continues depressed here. The shortness of the crop, and the low price of wheat, corn and peas, have interfered with the material prosperity in this county this season. Nevertheless there has been several transactions in real estate here, which seems to indicate that there are some people who have faith in the ultimate great prosperity of the place. On the completion of the Narrow Gauge Road it will certainly command a great and valuable country, and will present fine openings to active business and capital. They will be welcomed.

## THE WELDON FAIR.

Second Day—Exciting Races—Glass Ball Shooting.

Special to the News.

WELDON, N. C., Oct. 29.

The second day of the Fair was a success, although it threatened rain early in the day.

The racing was excellent and closely contested. The first was a three mile race, best two in three. Entries—Blue Wing, Billie M. and Altamont. Altamont won the first heat; Blue Wing the second and third, and the race; time, 2:31, 2:39, 2:47.

The second race was a mile dash. Entries—Swannanoa, Santuc and Goodall. Swannanoa won. Time, 1:51.

The third race was a running one, half mile and repeat. Entries—Billie, Red Slipper, Oh My and First Chance. Red Slipper won. Time, 1:10, 1:12, 1:14.

The fourth race was a running one, half mile and repeat. Entries—Billie, Red Slipper, Oh My and First Chance. Red Slipper won. Time, 1:10, 1:12, 1:14.

Some fine stock was entered yesterday and more is coming in this morning. The exhibition in that respect promises to be much better than ever heretofore.

The military parade takes place to-morrow, when several companies are expected to be present.

## For Assistant Doorkeeper of the House.

Correspondence of the News.

MARION, N. C., Oct. 25.

Allow me to say through your paper that Mr. J. P. Norton, of McDowell county, is a candidate for the position of Assistant Doorkeeper of the House.

Mr. Norton held this position for the last two sessions of our Legislature, and has acquitted himself with great credit, and his official conduct met the hearty approval of all. He is faithful to duty, always polite and accommodating, and we hope he will again be elected to that position.

McDOWELL.

## Personal Freedom.

Courier Journal.

The Philadelphia North American has many a Republican organ, and abandons the ground taken a few weeks ago, that the mission of the Republican party is to secure "honest money" for the country. The North American says the sole mission of the party now is to give "personal freedom" to the colored people of the United States. It may be that in the Northern States some such thing is needed by the colored people, but their Southern brethren would not doubt bring an action for slander against the individual who would intimate to them that they are slaves.

## A Revival of the Antique.

N. Y. Tribune.

There exists just now a passion for the word rococo, which is applied to dress, landscape gardening, furniture and a brace of things generally. It is an age of rococo or retrograde. A fashionable belle will have her costume à l'Empire, with bonnet or hat of Louis Seize, and jewels Roman, Japanese or Egyptian. So some become carelessly or inconsiderately patchy, indeed, but to all this one would not object if women would study art and different ages. Many fashionable modistes frequent theatres solely for the purpose of studying the ancient costumes of the actresses and prime donne. London and Paris managers comprehend perfectly the necessity of a "sublime toilette," and celebrated painters, such as Roux, Durand, and others, search books of the Renaissance and other epochs, sketch drapery, invent patterns and combinations of colors, which in turn are made up by famous modistes gratuitously for the renown given their names.

## An Editor Fined.

The editor of a paper in New Jersey called the non striking operatives of a mill "scabs," and was fined \$500. This sum was at once paid by the working men and women of the city, who also drew the editor through the streets in an open carriage, by hand, with great rejoicings.

## Designs for a Statue of General Lee.

Boston Herald.

There have been executed in Rome two designs of American sculptors in competition for the proposed equestrian statue of Lee, to be erected at Richmond. One of these is by Mr. M. E.

## kiel, the Cincinnati sculptor, and the other is by Mr. A. E. Harnisch, formerly from Philadelphia, but for the past eight years a resident of Rome. The model by the last named sculptor is a remarkable one in respect to its simplicity, and presents the general in a calm and dignified attitude, and with uncovered head. The design prepared by Mr. Ezekiel is a more elaborate one. The model by the Cincinnati sculptor is a remarkable one in respect to its simplicity, and presents the general in a calm and dignified attitude, and with uncovered head. The design prepared by Mr. Ezekiel is a more elaborate one. The model by the Cincinnati sculptor is a remarkable one in respect to its simplicity, and presents the general in a calm and dignified attitude, and with uncovered head. The design prepared by Mr. Ezekiel is a more elaborate one.

## THE POISONING CASE.

**Contradictory Evidence—Don't Rained—Able Speeches of Counsel—A Verdict of Not Guilty.**

Correspondence of the News.

FAVETTEVILLE, Oct. 28th.

The trial of the Godwin case has terminated after arduous duties performed by all parties concerned.

All the witnesses spoken of before stated that this woman died with convulsions, and that while suffering, her fingers, muscles, &c., would become clenched and stiff, these signs indicating that the victim was dying from the effects of a poison known as strychnine.

Allen Wood and John C. Wade, introduced as the last witnesses on the part of the State, testified in substance as follows: That they saw Hansel Godwin on the day in question, about or near sundown, coming from the direction of Polly Blackmore's house; that he appeared very much excited; looked suspicious and seemed in quite a hurry.

The first witness introduced by the defense, was a negro man, whose evidence proved quite a shock to the State, and if McKoy was seen about the house and that after her death he seized upon all the property within apparent right. Here it was claimed that Godwin had no motive in killing the woman while McKoy's actions after her death it seemed that he did.

The evidence introduced proved that John A. McKoy was seen about the woman's all that day and acting in a very suspicious manner. Being seen at one time behind a hay stack as if in the act of hiding.

In the argument it was claimed by the defense that the State had failed to prove that the retorts, crucibles, etc., used by Dr. Hinsdale in his analysis, were clean, but they had proved that these instruments had been used by him for seven or eight years in analyzing poisons of different kinds. Here it was argued, it was very possible that small particles of poison might have been left in these instruments from former experiments. The argument of the defense was that the retorts, crucibles, etc., were clean, but they had proved that these instruments had been used by him for seven or eight years in analyzing poisons of different kinds. Here it was argued, it was very possible that small particles of poison might have been left in these instruments from former experiments.
